

Grant to Implement the Tracker

This application is for a \$2,500 implementation grant designed to help post-secondary institutions begin or build on their work with the Campus Mental Health Action Tracker.

This brief application should take approximately 15–20 minutes to complete. Institutions are not expected to have completed their Tracker assessment. The grants are intended, in part, to address staffing, coordination, and resource barriers that may have limited progress to date. Funded activities are expected to be completed within a 12-month period.

Eligibility

To apply, your institution must:

- have entered a response to at least one Tracker item by the application deadline;
- identify a staff lead responsible for the funded activities;
- agree to update its Tracker assessment during the grant period;
- agree to complete the short Tracking Our Progress survey, including an optional conversation; and
- agree to provide a brief (15–20 minutes) final update on activities and use of funds.

Institution and contact information

----------------------	----------------------

Grant stream

- ☐ Smaller-enrolment PSI: fewer than 20,000 students
- ☐ Larger-enrolment PSI: 20,000 students or more

How would your institution use the \$2,500 grant to advance its use of the Tracker?

Maximum 250 words.

Grant funds may support activities directly related to completing Tracker assessments. Eligible expenses may include staff time or temporary backfill, student or research assistant support, working group or assessment sessions, honoraria, consultation, data gathering, and internal reporting. Funds cannot be used for activities unrelated to completing Tracker assessments.

What do you expect to accomplish during the grant period?

Maximum 150 words.
